

## INSTALLATION INSTRUCTIONS

**Step 1:** Unpack mantel from box and remove protective foam. **Note: The top flange of the mantel has pre-drilled mounting holes.**

**Step 2:** Remove mounting bracket from inside mantel. The mounting screws are in the pre-drilled holes.

**Step 3:** Determine and mark vertical and horizontal center for the top of the mantel, on wall. **Note: You will need to account for wall stud layout.**

**Step 4:** Center mounting bracket and install with 2-3 screws as shown in the diagram.

**Step 5:** Place the mantel on the mounting bracket, tight to the wall, and attach with 3 screws provided.
